

S4i Partners with Retail and Distribution Leader Retalix Delivering Paperless Functionality to their IBM System i Customers

S4i Systems' document distribution, archiving and retrieval capabilities promote cost efficiency and deliver value. Integration with S4i allows Retalix to provide customers the document imaging functionality they need from the leading provider in their markets.

San Clemente, CA, September 09, 2009 - S4i Systems, Inc., a leading supplier of electronic document management software solutions, today announces their partnership with Retalix, a global provider of enterprise-wide software solutions for retailers and distributors. As a result of this reciprocal commitment, sales organizations will be able to offer a wider breadth of solutions to existing customers and prospects.

S4i has seen a surge in interest in S4i Express by independent foodservice vendors who see the value in improving workflow and eliminating paper from many of their core processes. Several customers have already integrated S4i Express and S4i Image XP into their Retalix Power Enterprise application suite. To illuminate the benefits delivered through the integration of these two systems, S4i has posted several customer case studies on their website. "We have been working with and listening to Retalix customers for a few years now", said Spencer Elliott, president and chief executive officer for S4i Systems. "Formalizing our relationship with Retalix provides greater synergy between the two organizations allowing us to meet their customers' needs with our end to end document management solution."

Providing a paperless path to the suite of Retalix products is a success story that S4i is proud to be a part of. According to Susanne States, sales and client services director for S4i Systems, "We've been diligent in our quest to better understand the food distribution industry, listening to their customers and working together to help achieve many of their goals. As we've found each Retalix customer to be unique, our partnership with Retalix allows us to cohesively leverage product technologies offering better integration, greater functionality and faster ROI."

About S4i Systems

S4i Systems provides electronic document management and disk management solutions for IBM System i™ and IBM Power Systems. With a strong commitment to continuously delivering trusted value, S4i's customer and service driven team provides project design, management and implementation services to ensure a successful software deployment.
